I want to provide you with a comprehensive overview of what I need for the Frequency Strategy Group website. The current website, which is hosted through GoDaddy, needs significant improvement. I would like you to review the existing site and rebuild it into a professional, modern, polished website that accurately reflects our company, our services, our expertise, and the value we bring to clients.

Website: https://FrequencyStrategyGroup.com

Company name: Frequency Strategy Group, Incorporated

Lead Consultant: Sheena Wright

Email: Sheena.L.Wright@FrequencyStrategyGroup.com

Telephone: 289-489-4798

Please use “Frequency Strategy Group” as the public-facing brand throughout the website. The legal corporate name is Frequency Strategy Group, Incorporated. The website domain and email address should remain as provided, without adding “Inc.” to either.

The goal is to build a website that establishes credibility, attracts clients and partners, generates consulting and funding opportunities, and makes it easy for individuals, businesses, nonprofits, healthcare organizations, and community agencies to understand how we can help them.

1. Brand Identity and Company Positioning

Frequency Strategy Group is a Black-owned, women-led consulting company that brings together professionals from different disciplines to help organizations, entrepreneurs, nonprofits, and individuals solve complex problems and turn ideas into achievable outcomes.

We bring together strategic planning, clinical and healthcare expertise, community development, funding strategy, disability case management, business development, and specialized consulting.

Our approach is collaborative and solutions-focused. We listen to understand the client's needs, identify the challenges and opportunities, and develop a structured strategy to help them move forward.

What our name means

The name Frequency Strategy Group reflects the philosophy behind our work.

Frequency — We listen.

Frequency relates to sound, wavelengths, communication, awareness, and being receptive to what is happening around us. We believe effective consulting begins with listening. Just as we have two ears to listen, we take the time to understand our clients, their circumstances, their goals, and the challenges they are trying to overcome.

We do not believe in offering generic solutions before understanding the problem.

Strategy — We develop the plan.

Once we understand the client's needs, we develop a practical, methodical strategy. We identify resources, opportunities, partnerships, funding options, and actionable steps that can help turn their vision into reality.

Group — We bring the right expertise together.

Our company works with a group of consultants and partners from different professional disciplines. This allows us to connect clients with the knowledge, expertise, and resources needed to address challenges that may require more than one area of specialization.

Our philosophy is simple: listen carefully, understand the problem, develop the strategy, connect the right people, and work toward measurable results.

Suggested brand statement:

We listen. We strategize. We connect. We deliver.

Suggested positioning statement:

Equitable strategy. Expert execution. Measurable impact.

2. Mission, Vision and Values

Please create a dedicated Mission, Vision and Values section on the website.

Mission

Frequency Strategy Group transforms strategic vision into execution by bringing together clinical expertise, community insight, business strategy, and innovative solutions to achieve meaningful, measurable results.

We connect people, organizations, expertise, and resources to help solve problems, overcome barriers, secure opportunities, and build sustainable solutions.

Vision

To create a more equitable future where organizations, communities, and leaders have the strategy, expertise, and resources to turn ambitious ideas into meaningful, measurable impact.

Core Values

Equity and Access: We work to reduce barriers and improve access to resources, opportunities, funding, and professional expertise.

Expertise and Evidence: We draw on professional knowledge, practical experience, research, and evidence-informed approaches to develop effective solutions.

Listening and Understanding: We begin by listening to our clients and understanding their individual circumstances before recommending a course of action.

Collaboration and Partnership: We believe complex problems are best addressed by bringing the right people and disciplines together.

Innovation and Transformation: We look for creative, forward-thinking solutions that help clients grow, adapt, and succeed.

Execution and Accountability: We focus on turning plans into action, establishing clear objectives, and working toward tangible outcomes.

Compassion and Respect: We treat our clients and partners with dignity, professionalism, empathy, and respect.

Community Impact: We believe that stronger organizations, accessible services, and sustainable businesses can contribute to stronger communities.

3. About Us

Please develop a professional About Us page that explains our background, purpose, expertise, and approach.

Suggested website copy:

At Frequency Strategy Group, we believe every organization has the potential to shine when it has the right strategy, expertise, partnerships, and resources.

We are a multidisciplinary consulting company that helps businesses, nonprofits, healthcare organizations, entrepreneurs, and individuals navigate challenges and pursue meaningful opportunities.

Our work begins with listening. We take the time to understand where our clients are, where they want to go, and what is standing in their way. From there, we develop tailored strategies that connect them with the right resources, expertise, partnerships, and funding opportunities.

Our services span funding and grant development, business strategy, healthcare and community development consulting, disability case management, sports career management, organizational planning, and specialized project development.

Rather than taking a one-size-fits-all approach, we collaborate with a network of consultants and professional partners to build solutions around each client's specific needs.

Frequency Strategy Group is committed to helping clients move beyond identifying problems to developing practical solutions, building capacity, and creating lasting impact.

We want visitors to understand that we are not simply providing advice. We work to connect strategy with implementation.

4. Our Services

Please create a dedicated Services page with individual service descriptions. Each service should have its own section and, where appropriate, its own page with a clear call to action.

A. Funding Strategy and Grant Development

We help businesses, nonprofits, community organizations, and entrepreneurs identify potential funding opportunities and prepare strategic funding applications.

Services may include:

* Grant opportunity identification and funding research.
* Grant eligibility assessment and funding strategy.
* Grant application planning and development.
* Proposal writing and application review.
* Organizational needs assessments and project descriptions.
* Budget development and funding justification.
* Letters of support and partnership development.
* Funding-readiness assessments.

* Identification of potential government, foundation, corporate, and community funding sources.

* Strategic support for capital projects, program development, and organizational growth.

We also collaborate with partner consultants where specialized expertise is required.

Our website should make it clear that we help clients identify and pursue appropriate funding opportunities. Funding awards are subject to eligibility, funder requirements, and the funder's final decision.

B. Business Consulting and Strategic Planning

We support entrepreneurs, small businesses, and established organizations that need help turning an idea into an actionable plan.

Services include:

* Business strategy and growth planning.

* Business model development.

* Strategic and operational planning.

* Organizational needs assessments.

* Business development and expansion strategies.

* Program and service development.

* Partnership and stakeholder engagement.

* Resource identification and strategic implementation planning.

* Support for organizations seeking to improve operations and build sustainable services.

We want to help clients move from having an idea to having a clear plan for how to execute it.

C. Nonprofit Development and Community Organization Support

We work with nonprofits and community-focused organizations to strengthen their capacity, develop programs, and pursue funding opportunities.

Services include:

* Nonprofit program development.
* Funding and grant strategy.
* Organizational planning.
* Community needs assessments.
* Partnership development.
* Program design and implementation planning.
* Resource mobilization.
* Strategic support for community initiatives.
* Assistance with developing sustainable models for service delivery.

Our approach is particularly relevant to organizations serving marginalized populations and communities facing barriers to services and resources.

D. Healthcare and Community Health Consulting

Healthcare is an important area of our expertise.

We support healthcare organizations, clinics, community agencies, and entrepreneurs who are developing or improving healthcare-related services.

Services may include:

* Healthcare program development.
* Clinic planning and service development.
* Community health initiatives.
* Healthcare operations and workflow planning.
* Service navigation and access improvement.
* Quality improvement and performance measurement.
* Risk assessment and policy development.
* Partnership development.
* Community engagement.
* Program evaluation and implementation planning.
* Support for innovative, integrated models of care.

Our approach combines clinical knowledge, strategic planning, operational thinking, and an understanding of community needs.

E. Disability Case Management Consulting

We provide disability case management consulting informed by clinical experience and an understanding of the challenges that individuals and organizations face when navigating disability-related processes.

Potential services include:

* Disability case management consultation.

* Return-to-work and accommodation planning.

* Disability-related resource navigation.

* Case coordination and documentation support.

* Workplace accommodation strategy.

* Guidance on navigating complex disability-related situations.

* Support for organizations developing disability management processes.

Please present this service accurately and professionally, distinguishing consulting and navigation support from legal representation, medical diagnosis, or other regulated professional services.

F. Sports Career Management

We support athletes and sports-related clients with career planning, professional development, and strategic opportunities.

Services may include:

* Athlete career planning.

* Career development and transition planning.

* Strategic opportunity identification.

* Partnership and networking support.

* Brand and professional positioning.

* Business development and project planning.

* Coordination with relevant professional service providers.

The objective is to help athletes make informed decisions about their professional opportunities and long-term career development.

G. Shelter and Social-Service Project Development

We can assist organizations and community partners that are exploring the development of shelters and other social-service initiatives.

Potential services include:

* Project planning and feasibility support.
* Funding strategy.
* Program development.
* Partnership and stakeholder coordination.
* Resource identification.
* Operational planning.
* Community needs assessment.
* Implementation planning.

Please position this as consulting and project development support rather than suggesting that we operate every project we advise on.

H. Specialized Consulting and Strategic Partnerships

Some client needs do not fit neatly into a single service category. Our multidisciplinary approach allows us to work with partner consultants to address specialized challenges.

We can coordinate expertise across business, healthcare, disability management, funding, community development, and related fields.

Please include a general consulting inquiry option for clients who are unsure which service they need.

5. Who We Serve

Create a clear section explaining the types of clients we support.

Our intended audiences include:

* Small and medium-sized businesses.
* Entrepreneurs and start-ups.
* Nonprofit organizations and charitable initiatives.
* Healthcare organizations and clinic developers.
* Community health and social-service agencies.
* Organizations serving marginalized populations.
* Athletes and sports professionals.
* Organizations developing shelters and community programs.
* Leaders and organizations seeking funding, strategic planning, or specialized consulting.
* Community partners and institutions exploring collaborative projects.

Please ensure the website speaks to both for-profit and nonprofit clients.

6. Our Consulting Process

I would like a visual section that explains our approach in five steps.

Step 1 — Listen

We meet with the client to understand their goals, circumstances, challenges, and priorities.

Step 2 — Assess

We review the client's needs, existing resources, barriers, opportunities, and desired outcomes.

Step 3 — Strategize

We develop a tailored, structured plan with recommended actions, resources, timelines, and priorities.

Step 4 — Connect and Execute

We help clients connect with relevant expertise, potential funding sources, partners, and implementation resources.

Step 5 — Evaluate and Advance

We review progress against agreed objectives, identify next steps, and help clients build toward sustainable results.

The website should make this process easy to understand and visually appealing.

7. Our Consultants and Professional Network

Please create a Consultants or Our Team page.

Lead Consultant: Sheena Wright, BScN, RN

Sheena Wright is a healthcare and community development professional with more than 27 years of combined clinical and leadership experience. Her background includes clinical practice, healthcare leadership, program development, strategic planning, community partnerships, quality improvement, and operational development.

She brings a multidisciplinary perspective to consulting, combining clinical expertise with strategic thinking and an understanding of how organizations can translate their goals into practical solutions.

Her professional experience includes healthcare program development, community-based service delivery, clinic development, organizational planning, and collaboration across healthcare and social-service settings.

As Lead Consultant, Sheena works with clients to understand their needs, develop tailored strategies, and coordinate the expertise and resources needed to move projects forward.

Please build a professional profile for Sheena, with space for a photograph, credentials, areas of expertise, and a contact or consultation button.

Additional Consultants and Partners

Additional consultants and professional partners will be announced soon.

Please create a scalable section where additional team members can be added as their profiles become available. Each profile should support a name, professional credentials, biography, specialization, photograph, and relevant professional links.

Do not invent consultant names, credentials, or biographies.

8. Client Testimonials

Please create a testimonials section on the home page and a dedicated testimonials area if appropriate.

The following are the testimonial statements I would like incorporated into the design, subject to confirming the clients' permission and how their names may be displayed.

Meg — Funding Support

"Frequency Strategy Group has got me all the funding that I needed. Now my business is thriving."

Craig — Client Support

"Sheena and her team were there for me in my time of need."

Kevin — Business Growth

“Sheena and her team are helping me scale my business. They’re great to work with.”

Please use an attractive, professional layout that highlights the client feedback without making the page look crowded.

For now, first names only should be used. Do not add surnames, photographs, company names, or other identifying information without authorization.

9. Home Page Layout

I want the home page to immediately communicate what Frequency Strategy Group does and why a client should contact us.

Please consider the following structure:

1. Hero section: A strong headline, a short description of our consulting services, and two buttons: “Book a Consultation” and “Explore Our Services.”

2. Who We Are: A concise introduction to Frequency Strategy Group.

3. Our Philosophy: Explain the meaning of Frequency, Strategy, and Group.

4. Our Services: Display the primary consulting service categories with brief descriptions.

5. Who We Help: Showcase the types of organizations and individuals we support.

6. Our Approach: Present the five-step Listen, Assess, Strategize, Execute, and Evaluate process.

7. Why Work With Us: Highlight multidisciplinary expertise, personalized solutions, collaborative partnerships, and a focus on practical outcomes.

8. Client Testimonials: Feature the feedback provided above, once approved for publication.

9. Meet the Lead Consultant: Introduce Sheena Wright and link to the full profile.

10. Call to Action: Invite visitors to discuss a project, funding need, business challenge, or consulting requirement.

11. Contact Section: Display the company email, phone number, website, and contact form.

12. Footer: Include navigation links, service categories, privacy information, legal notices, and social media links once the relevant accounts are confirmed.

10. Additional Website Pages and Features

Beyond the home page, please plan for the following pages and functionality.

About Us

* Company overview.

* Our mission, vision, and values.

* Our philosophy and the meaning behind our name.

* Our consulting approach.

Services

* Separate descriptions for each major service area.

* Clear descriptions of deliverables and client benefits.

* Inquiry buttons linked to the relevant service.

Our Team

* Lead Consultant profile.

* Future consultant profiles.

* Professional partner information as appropriate.

Funding and Resources

* Information about our funding strategy and grant development services.

* General educational resources or articles that help clients understand funding readiness.

* Future downloadable guides or other resources as content becomes available.

Projects and Partnerships

* Space to highlight approved projects, collaborations, and case studies.

* The ability to add project descriptions, outcomes, photographs, and partner acknowledgements once authorized.

* No confidential client information should be published.

Testimonials

* Approved client testimonials and feedback.

Contact Us

* Contact information.

* Contact form with name, email, organization, service of interest, and message.

* An option for visitors to request a consultation.

* A confirmation message after a successful submission.

* Clear information about how inquiries will be handled.

Frequently Asked Questions

Potential questions include:

* What types of organizations do you work with?

* Can you help a nonprofit find funding?

* Do you work with for-profit businesses?

* Can you help develop a new program or clinic?

* Do you provide disability case management consulting?

* How does the consulting process work?

* How do we arrange an initial consultation?

* Do you guarantee grant funding?

The answer to the last question should clearly explain that funding decisions rest with the relevant funder and cannot be guaranteed.

Privacy and Legal Information

* Privacy policy.

* Website terms of use, if appropriate.

* Contact form consent and privacy information.

* Appropriate disclaimers regarding consulting, funding outcomes, regulated services, and professional advice.

* Cookie or analytics disclosures where applicable.

Please ensure any forms and analytics comply with applicable Canadian privacy requirements.

11. Website Design and Branding

The current site needs a much more professional visual identity.

I would like the design to feel modern, sophisticated, trustworthy, strategic, inclusive, and innovative.

Please consider:

* A consistent colour palette and typography.
* A professional logo placement and brand identity.
* Strong headings and concise, readable content.
* High-quality, relevant imagery.
* Attractive service cards and clear navigation.
* Subtle animations only where they improve the user experience.
* Consistent spacing and page layouts.
* Clear calls to action throughout the site.
* A design that communicates both professional expertise and a human-centred approach.

The website should not look like a generic template. It needs to communicate that we are a multidisciplinary consulting group capable of supporting complex projects and connecting clients with specialized expertise.

Please propose a design direction and show me a preview before the full site is finalized.

12. Technical Requirements

Please review the current GoDaddy website and identify what can be improved, what should be rebuilt, and which existing assets can be retained.

The website must be:

* Fully responsive on desktop, tablet, and mobile.
* Easy for us to update without needing to rebuild the site each time content changes.
* Secure, with HTTPS enabled.
* Optimized for search engines.
* Fast-loading and accessible.
* Connected to the correct domain and business email.
* Equipped with working contact forms and appropriate spam protection.
* Set up with website analytics, subject to appropriate privacy disclosures.
* Structured with clear page titles, meta descriptions, headings, image alt text, and search-friendly URLs.
* Designed so that new consultants, services, projects, and testimonials can be added later.

Please also check the domain configuration, hosting arrangement, mobile display, navigation, broken links, forms, and any existing search-engine indexing.

The public-facing domain should remain FrequencyStrategyGroup.com.

The primary contact details to display are:

Frequency Strategy Group

Lead Consultant: Sheena Wright

Phone: 289-489-4798

Email: Sheena.L.Wright@FrequencyStrategyGroup.com

Website: https://FrequencyStrategyGroup.com

Please do not publish a physical office address until we confirm the appropriate public business address.

13. Search Engine Optimization and Business Development

I want the website to help generate real consulting inquiries, not simply act as an online brochure.

Please optimize the content naturally for relevant searches, including:

* Business consulting.
* Grant writing and funding strategy.
* Nonprofit consulting.
* Healthcare consulting.
* Community health consulting.
* Disability case management consulting.
* Clinic development consulting.
* Sports career management.
* Strategic planning and organizational development.

These are suggested search themes, not a request to make unsupported claims about rankings or guaranteed search results.

Please also consider a future blog or insights section where we can publish articles about funding readiness, organizational growth, community development, healthcare innovation, and strategic planning.

14. Calls to Action and Client Conversion

The site should make it easy for prospective clients to take the next step.

Please include clear options such as:

* Book a Consultation.
* Discuss Your Project.
* Explore Funding Support.
* Request Consulting Services.
* Partner With Us.
* Contact Our Team.

We should have one clear primary call to action on the home page and relevant calls to action on each service page.

If online booking is included, please recommend an appropriate scheduling solution and explain any associated costs before setting it up.

15. Future Growth and Scalability

Frequency Strategy Group is also involved in broader community health, social-impact, and development initiatives. Our longer-term work includes supporting projects and partnerships that connect healthcare, community services, education, and other resources.

Our broader organizational ecosystem includes initiatives associated with Alchemy Health, Alchemy Pharmacy, Alchemists Medical, Always Alchemy, and Elevated Education.

Please structure the website so that we can describe relevant affiliated initiatives and partnerships where appropriate, without confusing the consulting company's identity with the individual organizations or suggesting that every initiative is a direct service of Frequency Strategy Group.

We need a flexible website that can grow as we add consultants, develop new services, establish partnerships, and expand our portfolio of projects.

16. Deliverables and Next Steps

Please review this brief and come back to me with:

1. Your recommended website structure and sitemap.
2. A proposed visual design and home page mock-up.
3. Your recommended approach for rebuilding the existing GoDaddy site.
4. Any additional information, images, logos, or content you need from me.
5. A breakdown of the work involved, estimated costs, and expected timeline.
6. Any ongoing hosting, maintenance, scheduling, or other software costs.
7. A plan for reviewing, testing, and launching the completed site.

I would like to review the initial design and content layout before the entire website is built. Please flag any areas where you think additional information or professional input is needed rather than making assumptions.

The most important thing is that the website clearly explains who we are, what we do, who we help, and how we help clients turn challenges into practical solutions.

I want Frequency Strategy Group to have a website that reflects the quality of the work we intend to deliver: professional, thoughtful, strategic, inclusive, and results-oriented.

Thank you for helping us bring this vision to life. I look forward to reviewing your proposed design and next steps.
